

eur@PLANET virtual summer school

Asteroid Photometry

FOR PROFESSIONALS & AMATEURS

**Remote observations
at the Molėtai Astronomical Observatory of Vilnius University
and hands-on analysis of observations
at the Astronomical Observatory Institute
of A. Mickiewicz University**

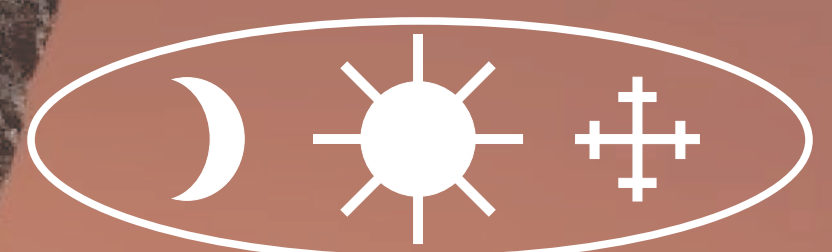

August 16 to 27, 2021

The aim of the course is to give participants a thorough, multidisciplinary introduction into the ground-based and space observations of asteroids.

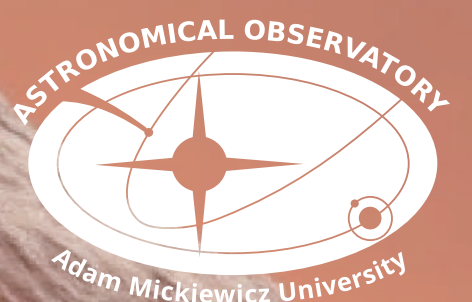

Participants will be trained in writing observing proposals to facilities of the Europlanet Telescope Network, mentorship possibilities between professional astronomers and amateurs will be introduced.

The course is open to PhD and master students, early career scientists, and amateur astronomers.

Participants will get diploma with 2.5 ECTS credits.
